

Human fetal blood

Seven data modalities

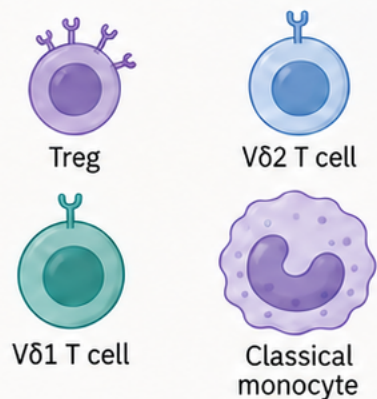

12 pcw

~31 pcw

39 pcw

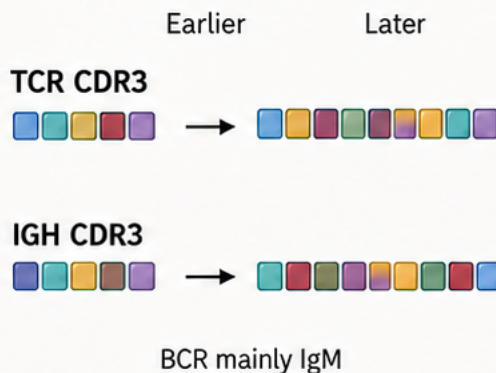

Coordinated
developmental shift

Cell composition

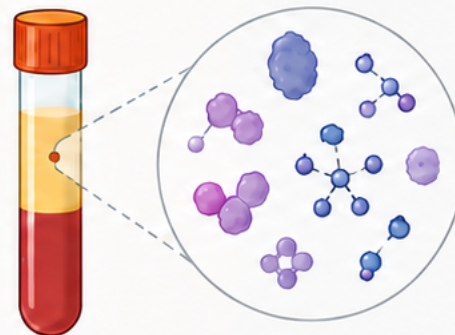

Treg, Vδ2 ↓
Vδ1, classical monocytes ↑

Receptor repertoires

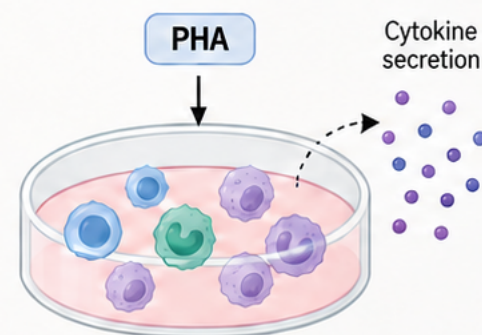

Longer TCR / IGH CDR3
Predominantly unique clonotypes

Plasma proteins

IL18, OSM, CCL11 ↑
sCD5, sCD6, sCD8A, sTRAIL ↓

Stimulation responses

Greater inducible
responses with age
